Créteil, Dijon, Cuneo, St. Louis (MI), Rouen**

Menton, Oct. 5<sup>th</sup>, 2012

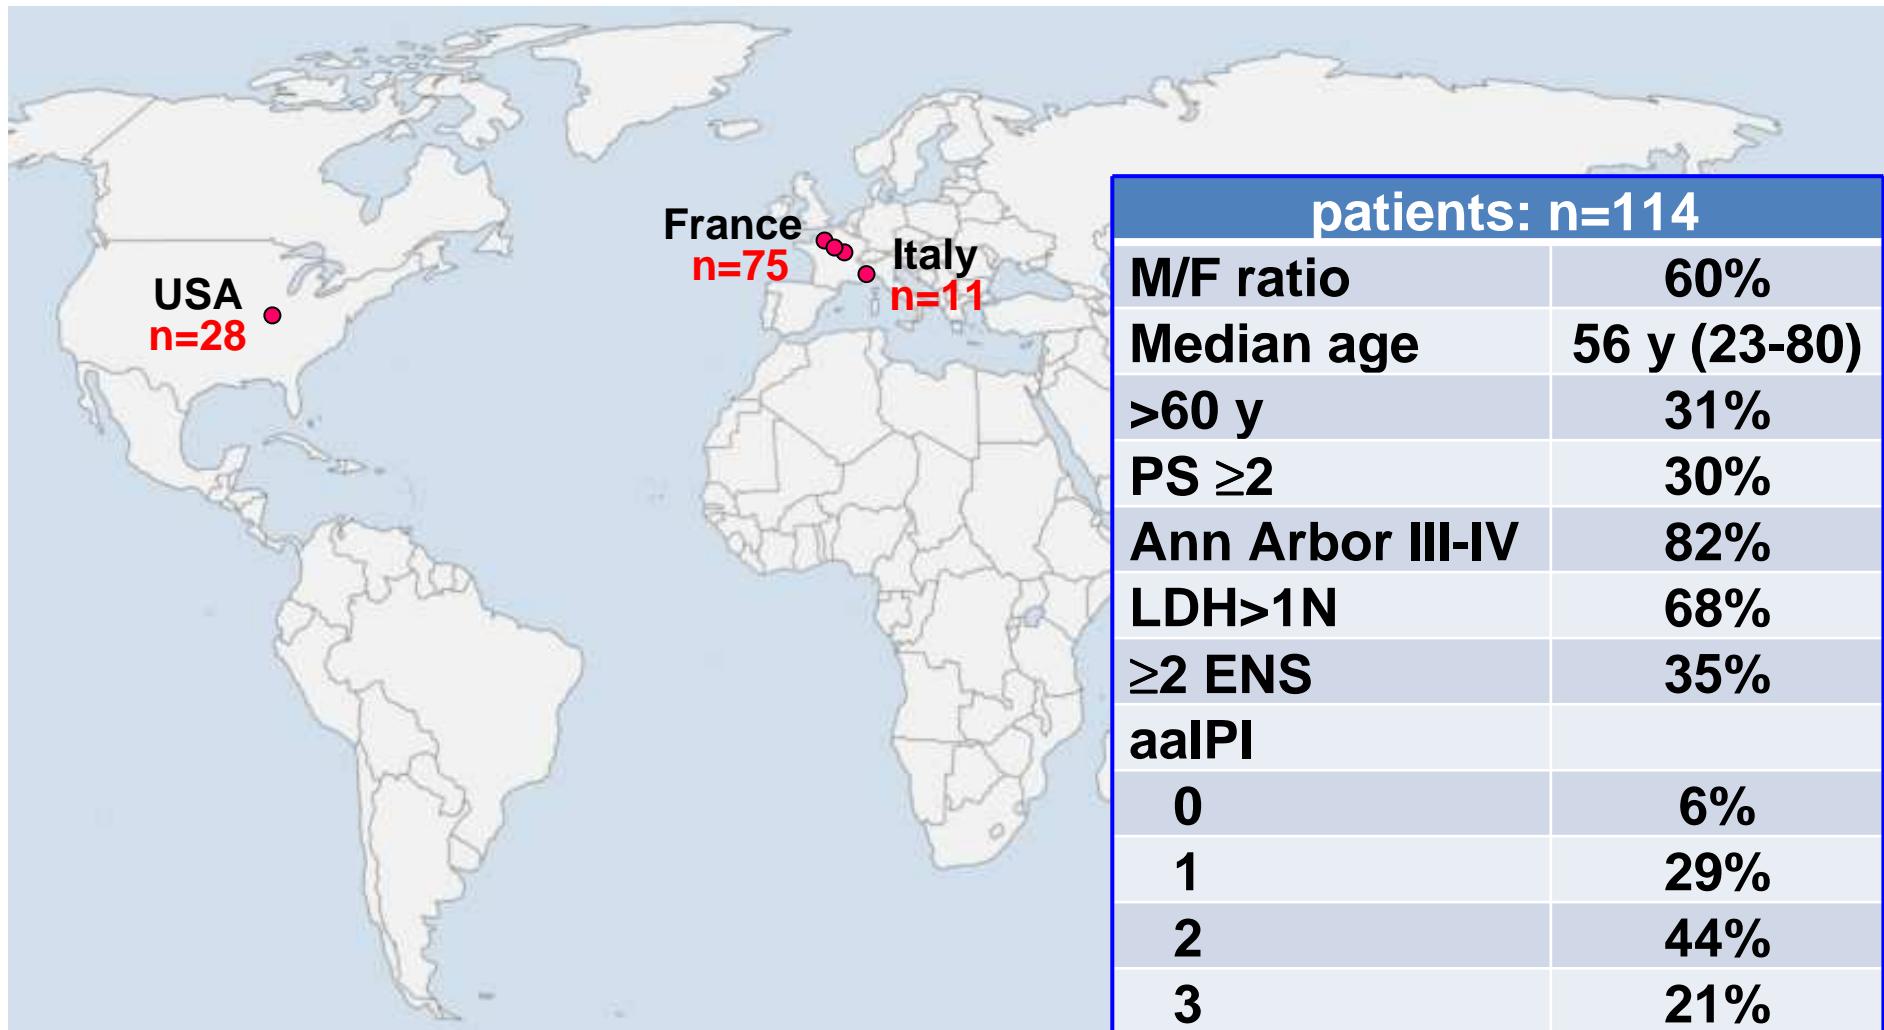

# IVS in DLBCL

## Inclusion criteria

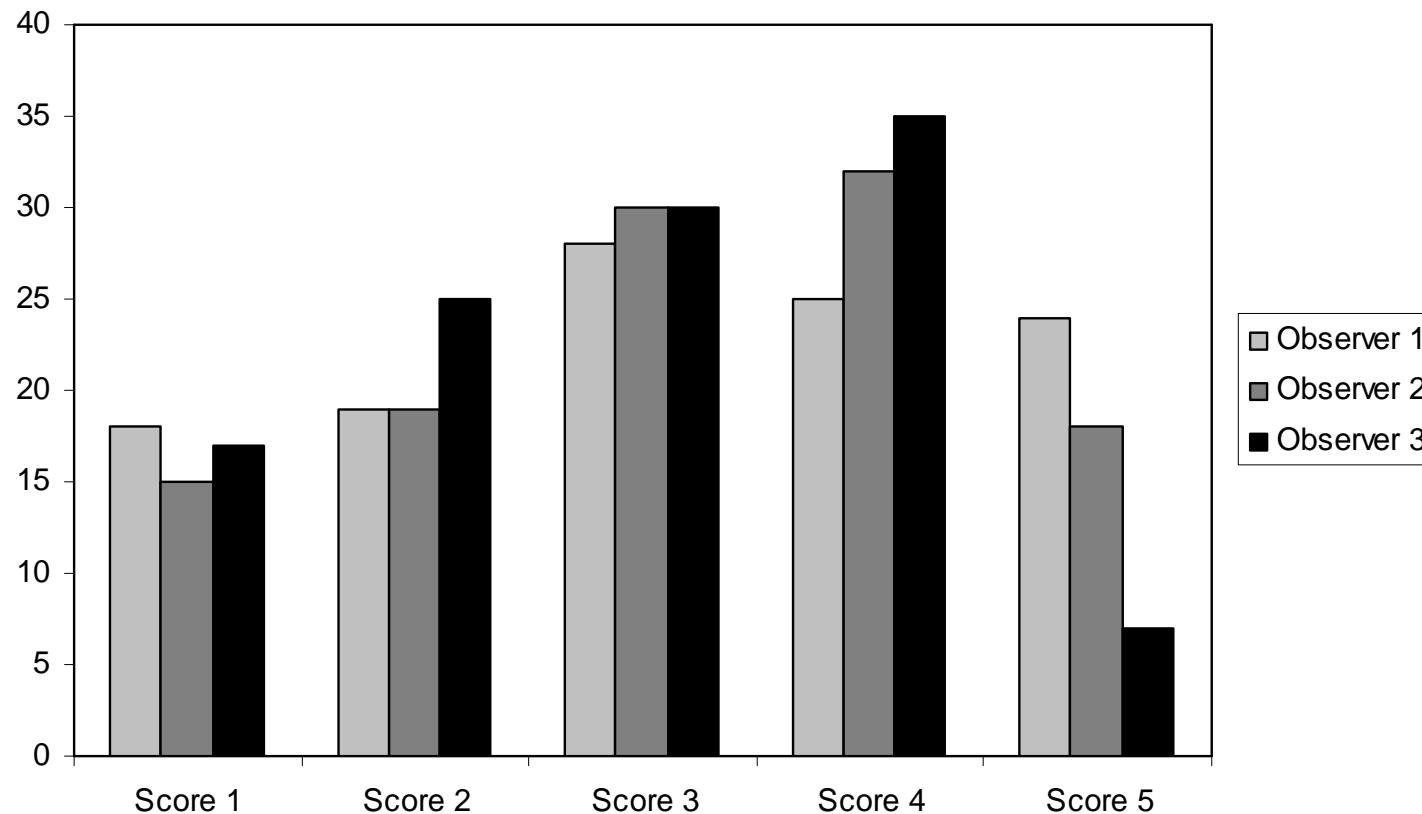

- Newly-diagnosed DLBCL
- PET/CT at baseline and 2 cycles (**- 6 C-PET**)
- No change of therapy based on interim PET
- First line: R-chemo (CHOP or ACVBP)
- HDT+ASCT in higher-risk pts or as salvage
- Minimum follow-up of 1 y, **endpoint = PFS**
- Central review (Imagys®)

# IVS in DLBCL

| R-CHOP14/R-ACVBP  | 81% vs. 61% (NS)                   | 78% vs. 44% (.01)               |

# Conclusion

- Best Deauville score  $\geq 4$  (liver)
  - moderate to substantial agreement
  - good outcome prediction
- Quantification ( $\Delta\text{SUV} \leq 66\%$ )
  - better reproducibility
  - same outcome prediction
  - high-risk patients (escalation protocols)
  - all chemotherapy regimens
